WARNING - Please don't be alarmed if you get a. Apr 4, 2019 · How to Create an SMS Alert for Your Android Phone. You may want to create an SMS alert for your phone to let you know when you get a new.(a) Field of the Invention The present invention relates to an adjusting device for a vehicle, which adjusts a height of a vehicle seat according to a situation. (b) Description of Related Art In a vehicle, in general, a seat belt is provided to a vehicle occupant so as to protect the occupant from a shock applied when an accident occurs. Conventionally, as an adjusting device of a vehicle seat for adjusting a height of a vehicle seat in accordance with a size of a vehicle occupant, a device of a variable-angle seat is known. In a conventional variable-angle seat, a seat belt provided to the vehicle occupant is provided at a predetermined angle, and the height of the seat can be adjusted by changing the angle of the seat belt. However, the above-mentioned conventional adjusting device of a variable-angle seat has the following problems. That is, in the above-mentioned conventional adjusting device of a variable-angle seat, the angle of the seat belt is adjusted in accordance with the size of a vehicle occupant, such that the height of the vehicle seat can be adjusted in accordance with the size of the vehicle occupant. Therefore, there is a problem in that when the seat belt is set to an inappropriate angle in accordance with the size of the vehicle occupant, the vehicle seat may be inclined excessively by a weight of the vehicle occupant in case of a sudden vehicle accident or the like, and an accident of the vehicle occupant may be caused by the same. Further, there is another problem in that when the angle of the seat belt is inappropriately set to a small angle in accordance with the size of the vehicle occupant, the seat belt is located under the shoulder of the vehicle occupant in case of a sudden vehicle accident or the like, such that the vehicle occupant is not adequately protected from the shock applied from the seat belt.
