The purpose of this study was to compare sex-role behavior patterns of female adolescent patients with and without obsessive-compulsive disorder. A sample of 26 female patients with obsessive-compulsive disorder and 27 female patients without obsessive-compulsive disorder participated in the study. Patients and controls completed a self-report measure that assessed sex-role behaviors. Results showed that obsessive-compulsive disorder subjects demonstrated significantly lower levels of masculine/feminine behavior and significantly higher levels of motherly/nurturing behavior than controls. These results are discussed in light of the literature and implications for treatment are presented.How Social Media Saved My Day I think it's safe to say social media has saved my day. I'm sure it's saved the day for lots of us at the end of the day. Whether it be Facebook, Twitter, Pinterest, Instagram, LinkedIn, SnapChat or YouTube we are constantly checking our Facebook, Instagram, Twitter, Pinterest or SnapChat pages and following and interacting with our friends, family and those in the world. The things we post are our thoughts and ideas. But sometimes those thoughts and ideas have negative connotations to some. One day a friend posted a picture of a boy and girl at a park holding hands. She captioned it "The boyfriend and girlfriend of the year." In the spirit of kindness, I posted this cute picture to my Instagram account. I used this picture with a few friends to compare that one day in May, 2014 (1 of 5) In the caption, I used the phrase, "#TheBestBoyfriendAndGirlfriend". I intentionally named them that because the picture showed them in their element. Both are smiling, happy and just enjoying their day. My friend liked the picture and commented, "Looks like an episode of 'Crazy Ex-
