Videora BlackBerry Curve Converter is a BlackBerry Curve video converter that converts video files, YouTube videos, movies and DVD's so you can play them on your BlackBerry Curve. The software can convert all types of video files (avi, divx, xvid, flv, x264, vob, mpeg, DVD's, YouTube, etc.) into the proper video formats (MPEG-4, H.264) that play on the BlackBerry Curve. Videora BlackBerry Curve Converter will allow you to quickly turn the selected files into the desired output format with only a few clicks! Software functionality:

- Ability to convert videos from different sources with only a few clicks
- No waiting to load the software while conversion is completed
- Recordings are saved by their original titles, including the date/time, quality, device, and length
- Thumbnails are saved, which can be used to quickly access the file you need
- Built-in media player to preview videos and play all the supported formats (AVI, MP4, WMV, FLV, HD PPT, XVID, VP6, MPEG4, MKV, MP3, MP4, WMV, AVI, and WEBM)
- Ability to convert protected/encrypted videos by the DVD/CD-Key method
- Automatic audio analysis while conversion to check if audio files are supported by the device
- Ability to customise the output format by selecting the Resolution, Video Bitrate and Frame Rate
- Ability to customise the output file size by selecting the Resolution, Video Bitrate and Frame Rate

Some of the features of Videora are not available on all platforms Unable to load 'pst' file The BlackBerry Curve 9290 is an excellent Android phone. However, it does not offer a web browser that can display websites designed for smartphones. If you want to view websites on the Curve 9290 using Opera Mini, you can download the Free Opera Mini browser from Opera's website. Opera Mini is an Android optimized version of Opera that does not include all of Opera's web browser features. However, the browser can display mobile website and is very easy to use. Unfortunately, some users have reported that their Android smartphone's screen is not visible when they launch the Opera Mini browser. If that happens, you can try loading the browser and selecting "Picture-in-Picture" from the Menu button. This mode can usually display your phone's display on the browser's toolbar.
